Measurement and Optimization of Responsiveness in Supply Chain Networks with Queueing Structures

Sin-Hoon Hum, Mahmut Parlar, Yun Zhou

PII: S0377-2217(17)30437-X
DOI: [10.1016/j.ejor.2017.05.009](https://doi.org/10.1016/j.ejor.2017.05.009)
Reference: EOR 14437

To appear in: *European Journal of Operational Research*

Received date: 20 October 2015
Revised date: 3 May 2017
Accepted date: 8 May 2017

Please cite this article as: Sin-Hoon Hum, Mahmut Parlar, Yun Zhou, Measurement and Optimization of Responsiveness in Supply Chain Networks with Queueing Structures, *European Journal of Operational Research* (2017), doi: [10.1016/j.ejor.2017.05.009](https://doi.org/10.1016/j.ejor.2017.05.009)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Uses Markovian queueing networks to model endogenous supply chain systems
- Measures and optimizes supply chain responsiveness
- Closed-form results for measuring responsiveness in the serial supply chain
- Converts the Jackson-type supply chain into a single-stage queueing system
- Detailed numerical examples are provided
