This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Identified the determinants of green logistics in a panel of 27 European countries.
- Energy, environment, and economic health are the strong predictors of green logistics.
- Logistics performance index required energy intensity to deliver the consignments at schedule time.
- Quality of transport infrastructure emphasizes the need for renewable energy to mitigate its environmental concerns.
- FDI, industrialization, and trade have a differential impact on energy, environment and economic health in a region.
