This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Explaining Sustainable Supply Chain Performance Using a Total Interpretive Structural Modeling Approach

### Highlights

- 1. The antecedents of the sustainable supply chain performance have been proposed.*
- 2. The Graph Theory Approach has been proposed to develop a theoretical framework.*
- 3. The TISM model and MICMAC output should be integrated to develop a testable framework.*
