This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Taxonomy of workflow partitioning problems and methods analyzing 40 papers.
- We provide a unified view of steps in a workflow lifecycle.
- We identify seven taxonomies covering types of workflow partitioning methods.
- Workflow partitioning types e.g. Role, Rule, QoS, Control path and Data driven.
- A survey of workflow partitioning methods is conducted in tabular format.
