This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We develop a model of taste-based discrimination in a random search environment.
- The model replicates patterns of black-white wage and employment gaps in the U.S.
- The model is estimated using data from the U.S. manufacturing sector from 2003 to 2006.
- We find evidence of employer prejudice and racial skill gaps.
- We use the estimated model to simulate the impact of different policies on labor market outcomes.
