Modelling inspection and replacement quality for a protection system

Alexandre R. Alberti , Cristiano A.V. Cavalcante , Philip Scarf ,
André L.O. Silva

PII: S0951-8320(17)31341-8
DOI: [10.1016/j.ress.2018.04.002](https://doi.org/10.1016/j.ress.2018.04.002)
Reference: RESS 6121

To appear in: *Reliability Engineering and System Safety*

Received date: 17 November 2017
Revised date: 24 February 2018
Accepted date: 5 April 2018

Please cite this article as: Alexandre R. Alberti , Cristiano A.V. Cavalcante , Philip Scarf , André L.O. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Four aspects of quality of inspection and replacement are modelled
- Defect induction, false positive and negatives, and component heterogeneity
- Defect induction is key determinant of optimal maintenance policy
- Guidance for prioritization of investment in quality improvement
