This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- The Analytic Hierarchy Process does not account for user profile disparities.
- A sensitivity analysis method is proposed to address these disparities.
- Inputs that most critically impact the aggregated group results are determined.
- Decision makers are now informed of the most influential elements of the process.
