This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

Energy use accounts for a significant share of the environmental impacts of the apparel sector.

Life cycle impacts of energy use in apparel production was analysed for key production phases.

The effect of alternative energy supply scenarios on environmental impacts was investigated.

Life cycle impacts of energy use can be greatly reduced with renewable energy use.
