This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An intelligent and automatic process to rank the performance in asset management
- An intelligent system to automatically find the most suitable practice for benchmarking
- An improved approach to determine the center of clusters
- Define outlier factors and analysis so that the best and poorest performers can be identified
