This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We consider the Job Sequencing and Tool Switching Problem.
- A Graph-based representation and a constructive heuristic are proposed.
- We propose a local search based on the 1-blocks neighborhood.
- We propose an implementation of the Iterated Local Search metaheuristic.
- Comprehensive experiments compares the proposed methods to the state-of-the-art.
