

Accepted Manuscript

Heuristic algorithms for the unrelated parallel machine scheduling problem with one scarce additional resource

Fulgencia Villa, Eva Vallada, Luis Fanjul-Peyro

PII: S0957-4174(17)30660-7
DOI: [10.1016/j.eswa.2017.09.054](https://doi.org/10.1016/j.eswa.2017.09.054)
Reference: ESWA 11575

To appear in: *Expert Systems With Applications*

Received date: 27 April 2017
Revised date: 14 September 2017
Accepted date: 25 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The problem of unrelated parallel machines with an additional resource is considered.
- Heuristic methods according to two different strategies are proposed.
- A comprehensive computational and statistical evaluation is carried out.
- The heuristic methods are shown to outperform previous results from the literature.
- The heuristic methods are able to solve bigger problems efficiently and effectively.
