This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- We introduced a reward mechanism to incentivise individuals to report themselves for exchanging bribes. This is similar to leniency offered to whistleblowers in anti-trust cases.
- Incentivising both parties to report their partner successfully destabilised trust and approximately halved the rate of bribes being exchanged and corrupt favours being granted. Incentivising only the bribe giver or receiver did not significantly diminish corruption.
- This paper provides an indication that a mechanism not unlike leniency offered to whistleblowers in cartels may be effective in combating petty corruption.
