Towards fully-facilitated discrete event simulation modelling:
Addressing the model coding stage

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- We use Business Process Model and Notation in a discrete event simulation framework
- This could take discrete event simulation a step closer to being fully facilitated
- It enables simulation model coding in facilitated workshops in some circumstances
- Barriers to model coding in workshops arise from model and data-analysis complexity
- We provide a contextual matrix of when fully-facilitated modelling is achievable
