To appear in: *Physica A*

Received date: 1 November 2017

Revised date: 8 December 2017

Please cite this article as: H. Ou, T.-Q. Tang, An extended two-lane car-following model accounting for inter-vehicle communication, *Physica A* (2017), <https://doi.org/10.1016/j.physa.2017.12.100>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

1. A two-lane car-following model with IVC is proposed.
2. The impacts of IVC on each vehicle's movement are studied.
3. The average density and speed are simulated.
