This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- First paper to develop a corporate water management accounting framework in the context of prior environmental management accounting.
- Outlines growing water crises and critical importance of accounting for decision making in the context of corporate water management.
- Strengths and weaknesses of nineteen current water accounting initiatives are examined against the water management accounting framework.
- Examines the potential contribution of water management accounting and makes suggestions for a future research agenda.
