This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We introduce and characterise fault-aware management protocols.
- We show how protocols permit analysing the management of composite applications.
- We show how to automatically recover stuck applications.
- We present a PoC for editing/analysing management protocols in TOSCA applications.
- We illustrate how we applied our approach to a concrete case study.
