This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An original experiment is designed to expose student cheating at an individual level.
- Contrary to previous experiments, many students were found to cheat maximally.
 - Student cheating is positively correlated with three achievement measures.
 - Contrary to survey-based studies, higher achievers were found to be bigger cheaters.
